PETALS

ENGINEERING CONSULTANCY

# ENGINEERING PRECISION. FROM GROUND TO DESIGN.

Integrated investigation, testing, analysis, design and engineering solutions.

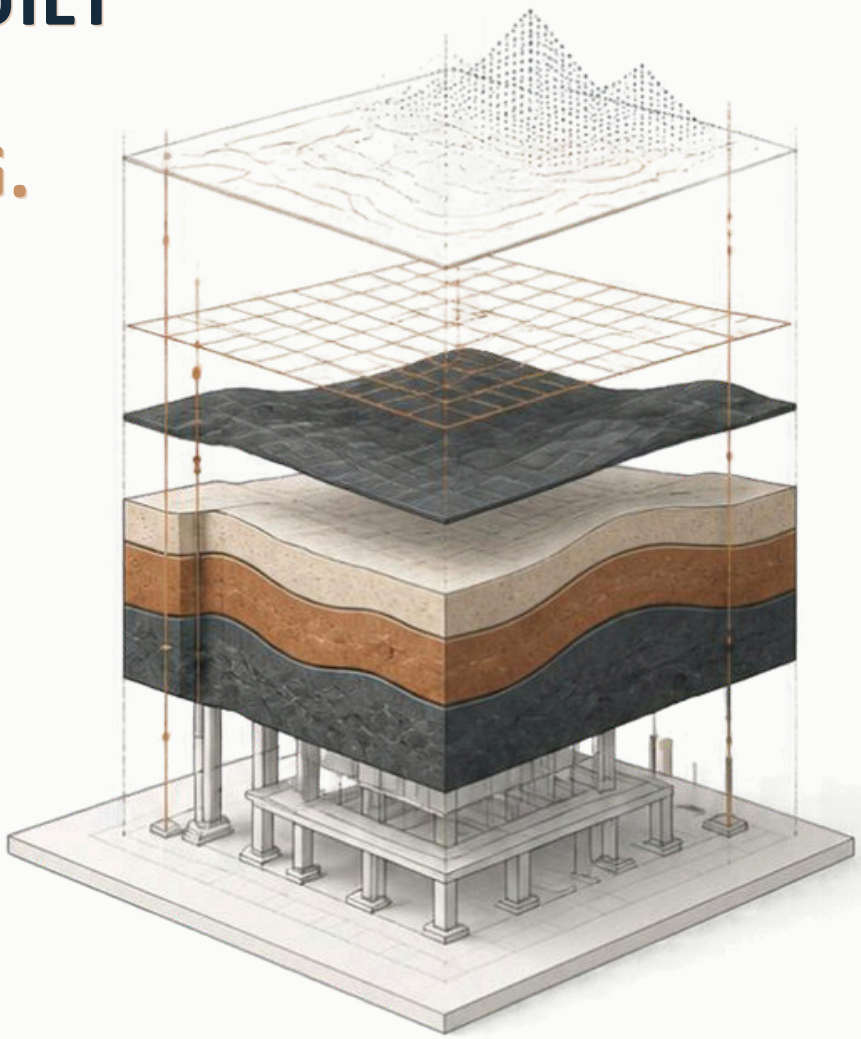

PETALS

ENGINEERING CONSULTANCY

**WHAT WE DO**

- Geotechnical Engineering
- Geotechnical Investigation
- Geophysics
- Testing
- Engineering Design
- BIM & Digital Engineering
- Infrastructure Consultancy
- Technical Advisory

# ENGINEERING, BUILT AROUND UNDERSTANDING.

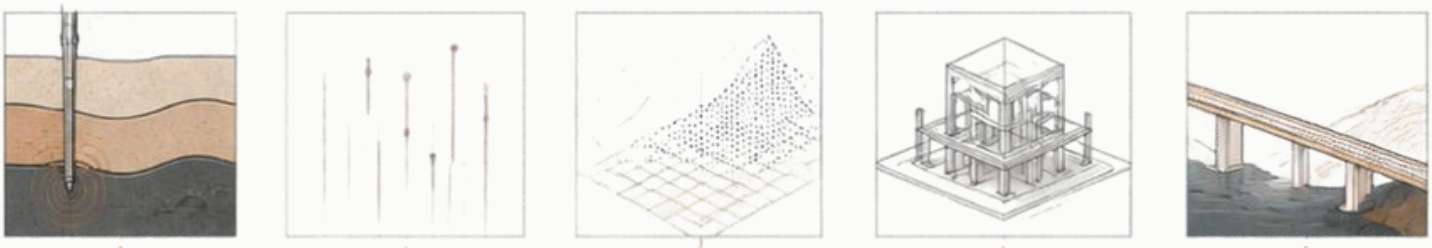

PETALS is a young, multidisciplinary engineering consultancy.

We help our clients make confident decisions by connecting ground, data and design.

Every project begins with understanding the ground, the data, the design requirements and the wider context. That understanding shapes better solutions, built to perform.

GROUND → DATA → ANALYSIS → DESIGN → DELIVERY

# THE PETALS PHILOSOPHY

## OUR OPERATING PRINCIPLES

PETALS combines technical capability with disciplined execution and business responsiveness. Our philosophy guides how we plan, deliver and create value—systematically, collaboratively
and with clarity at every stage.

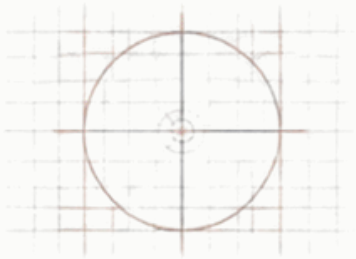

**PETALS**

ENGINEERING CONSULTANCY

1

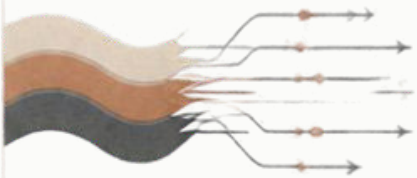

### P — PLANNING

We define clear objectives, scope and strategy. We plan with rigour to align people, resources and timelines for predictable delivery.

2

### E — EXECUTION

We execute with discipline and attention to detail. Our processes ensure coordinated action, quality and momentum throughout.

3

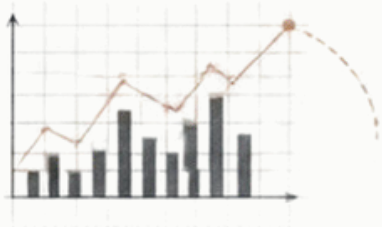

### T — TESTING

We validate through structured testing and verification. We confirm performance, safety and compliance before we move forward.

4

### A — ANALYSIS

We analyse data and performance to uncover insight. Evidence-led decisions drive continuous improvement and better outcomes.

5

### L — LEADERSHIP

We lead by example with integrity and accountability. We empower our team and partners to deliver with confidence.

6

### S — SALES / BUSINESS DEVELOPMENT

We build lasting relationships through understanding and trust. We connect capabilities to opportunities and create mutual value.

**A systematic approach. Technical excellence. Practical solutions. Measurable value.**

# FROM INVESTIGATION TO ENGINEERING DECISION.

7. SUPPORT

PETALS

ENGINEERING CONSULTANCY

# MULTIDISCIPLINARY ENGINEERING CAPABILITY.

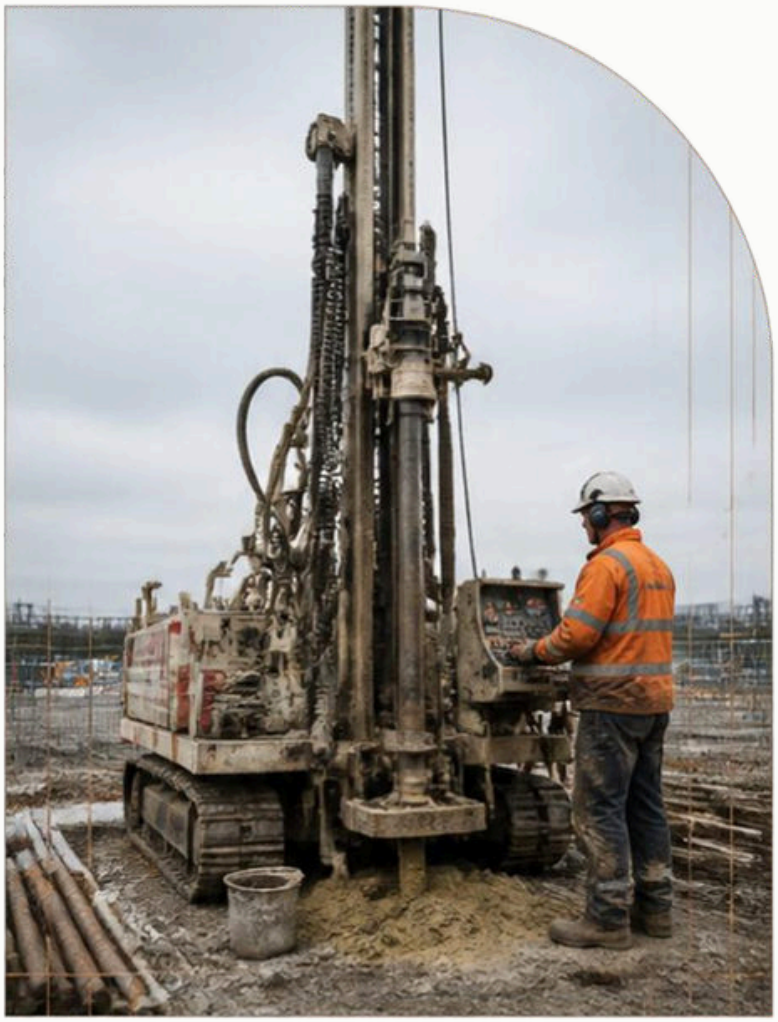

PETALS

ENGINEERING CONSULTANCY

# 01

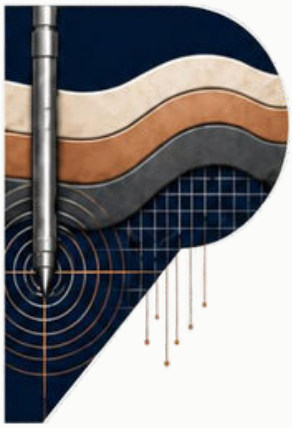

## GEOTECHNICAL

- Geotechnical Investigation
- Borehole Investigation
- Soil & Rock Investigation
- SPT
- CPT / SCPT / CPTu
- Soil Sampling
- Field Testing
- Geotechnical Interpretation
- Foundation Recommendations
- Foundation Design Support
- Ground Improvement
- Slope Stability
- Settlement Analysis
- Liquefaction Analysis
- Excavation & Dewatering
- Retaining Systems

Delivered through PETALS technical network and specialist partners where required.

02

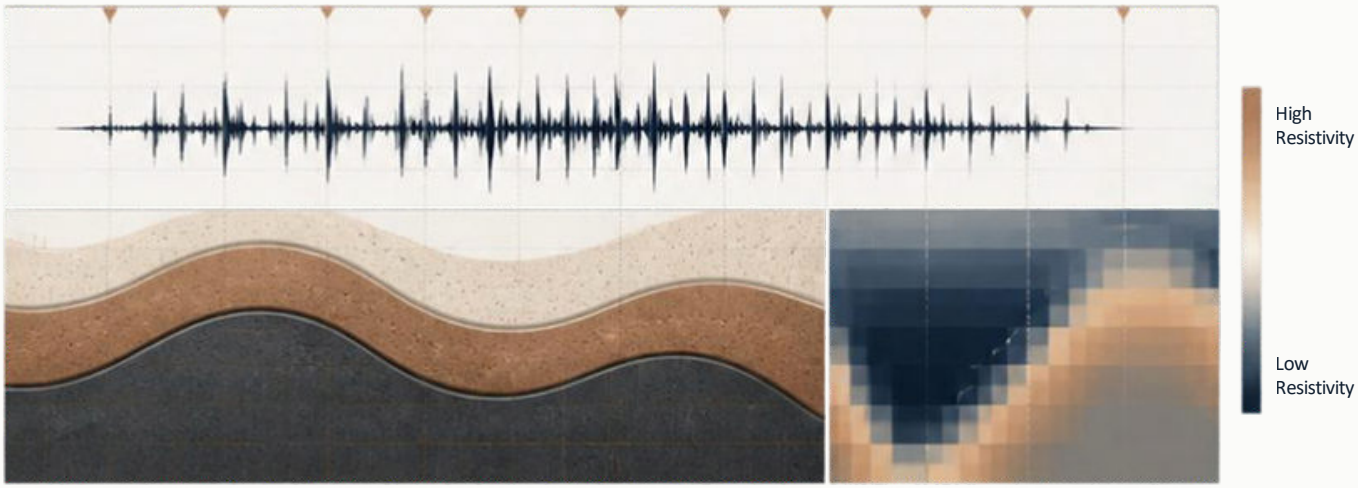

PETALS

ENGINEERING CONSULTANCY

# GEOPHYSICS

- Seismic Refraction
- Down-Hole / Cross-Hole Seismic
- MASW / SASW
- Electrical Resistivity Imaging
- GPR
- Parallel Seismic Testing
- Utility / Void Investigation
- Subsurface Mapping

Specialist capability supported through qualified technical partners.

PETALS

ENGINEERING CONSULTANCY

# 03

## TESTING

We provide independent testing coordination and technical support across geotechnical and construction materials to inform robust engineering decisions.

- Soil Testing
- Rock Testing
- Concrete Testing
- Direct Shear
- Triaxial Testing
- Consolidation
- Permeability
- Compaction & CBR
- Rock Strength & Durability
- NDT

Available through project-specific mobilisation.

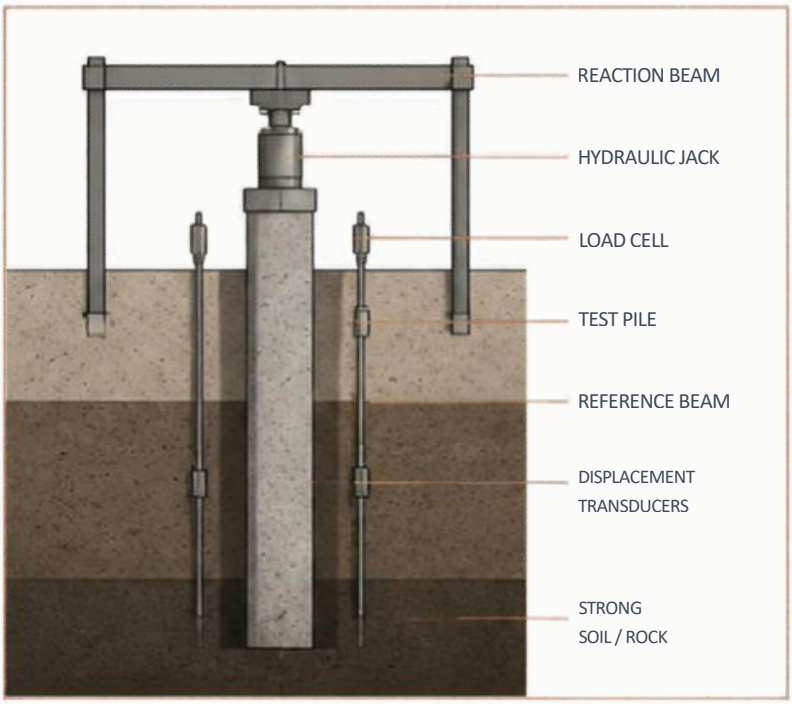

PETALS

ENGINEERING CONSULTANCY

04

# FOUNDATION & PILE TESTING

Independent foundation and pile testing to provide reliable data for confident design, verification and decision making.

- Static Pile Load Testing
- Dynamic Pile Testing
- Pullost Testing
- Lateral Load Testing
- Low-Strain Integrity Testing
- Cross-Hole Sonic Logging
- Instrumented Testing
- Foundation Test Interpretation

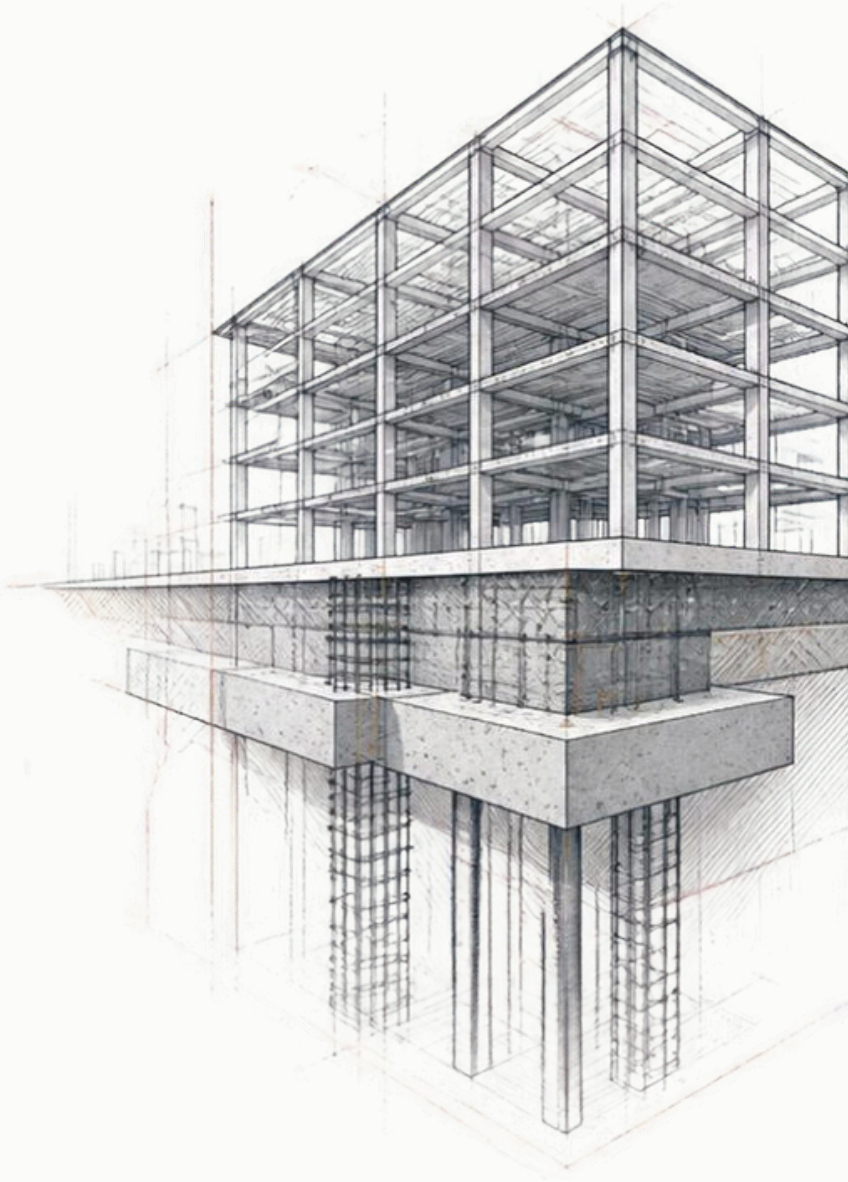

Delivered through PETALS technical network and specialist partners where required.

PETALS

ENGINEERING CONSULTANCY

# 05

# ENGINEERING DESIGN

We deliver practical, buildable and efficient designs that integrate performance, safety and constructability from concept through coordination.

- Design Review
- 3D Modelling
- BIM
- Technical Coordination
- Civil Design
- Structural Design
- Foundation Design
- Engineering Drawings

PETALS

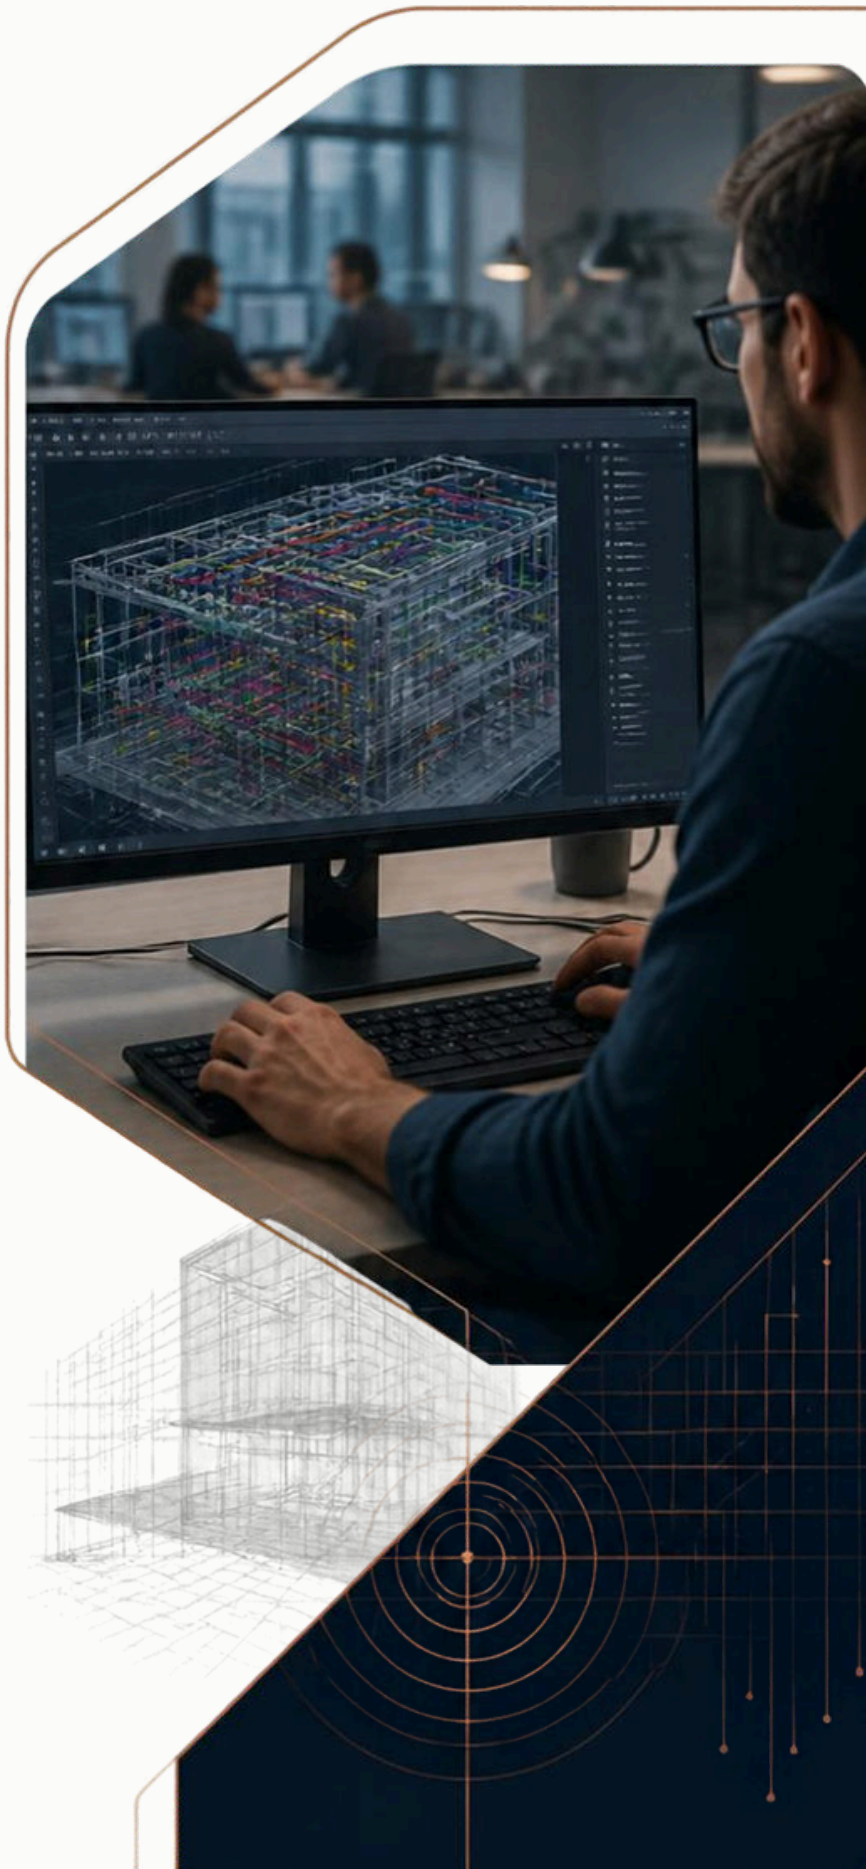

ENGINEERING CONSULTANCY

# 06

## BIM & DIGITAL ENGINEERING

- BIM
- 3D Modeling
- Clash Detection
- 4D / 5D
- Quantity Take-Off
- Scan to BIM
- Visualization
- BIM Consultation

Specialist capability supported through qualified technical partners.

PETALS
ENGINEERING CONSULTANCY

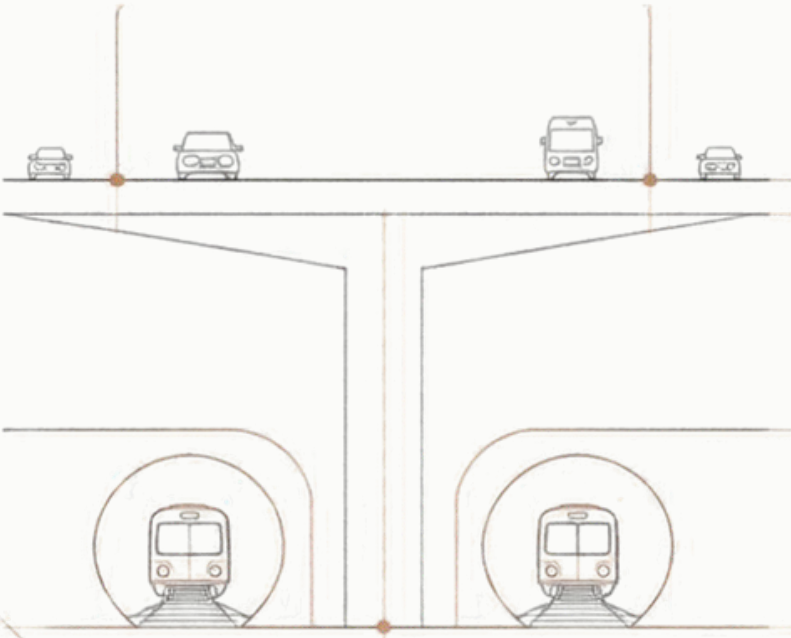

# 07

# INFRASTRUCTURE & TRANSPORTATION

We deliver integrated infrastructure and transportation solutions that connect communities, enhance mobility, and support sustainable growth.

- Highways
- Roads
- Bridges
- Railways
- Metro
- Airports
- Water Infrastructure
- Urban Infrastructure
- Transportation Planning

# 08

# PROJECT & TECHNICAL CONSULTANCY

PETALS
ENGINEERING CONSULTANCY

We provide end-to-end project and technical consultancy across the asset lifecycle. Our evidence-oriented approach ensures clear coordination, quality outcomes, and accountable delivery.

- Project Management
- Construction Management
- Technical Consultancy
- Third-Party Inspection
- Quality Assurance / Quality Control
- Tender & Bid Support
- Contract Management
- Value Engineering
- Technical Due Diligence
- Construction Monitoring

## EVIDENCE-ORIENTED COORDINATION WORKFLOW

**1. DEFINE**
Clarify scope, objectives, and success criteria.

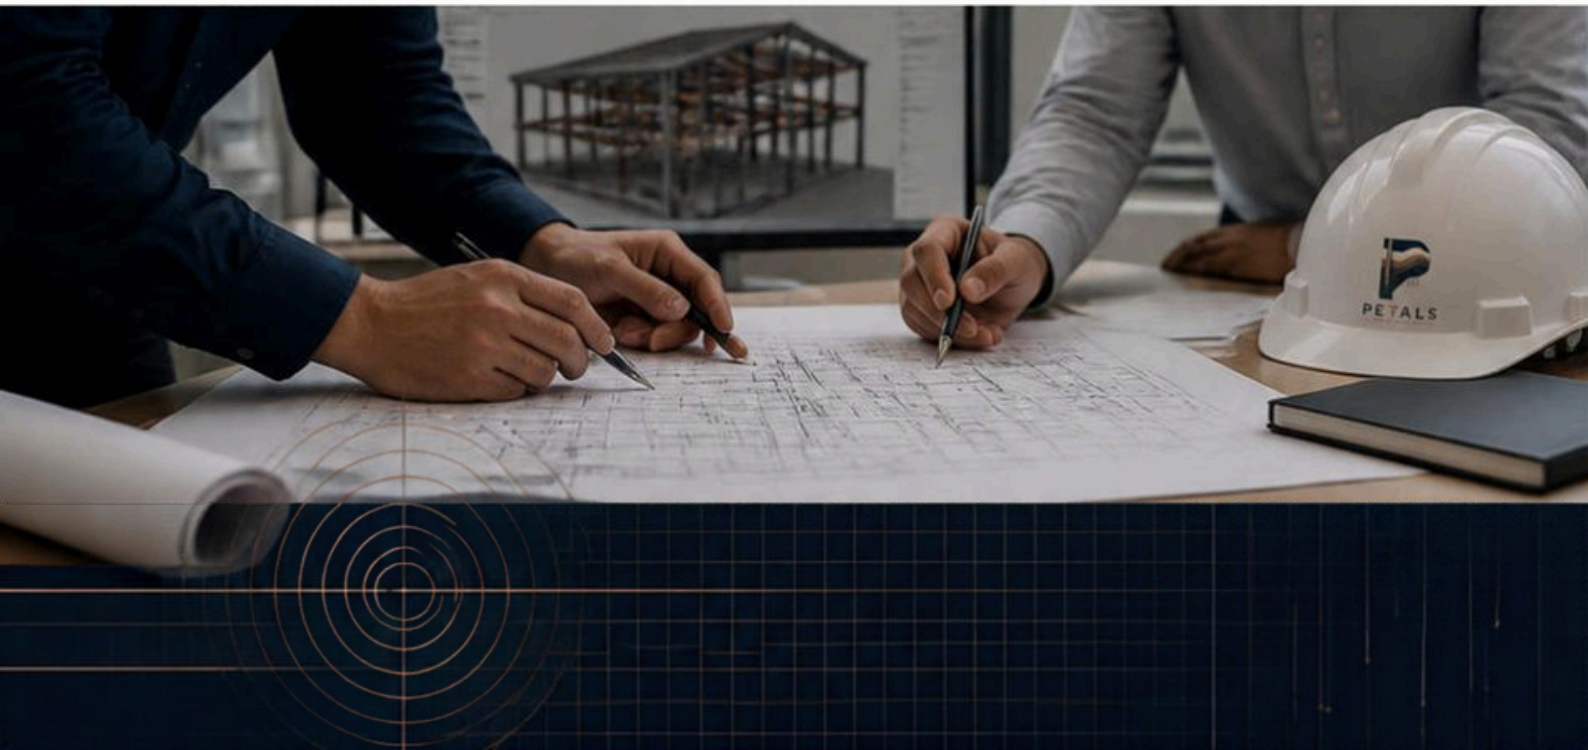

**2. PLAN**
Develop coordinated plans, resources, and milestones.

**3. EXECUTE**
Mobilise teams and implement with clear communication.

**4. VERIFY**
Inspect, test and review against standards.

**5. REPORT**
Document findings, progress, and decisions.

**6. IMPROVE**
Capture lessons learned and drive continuous improvement.

# INDUSTRIES
## WE SERVE

PETALS
ENGINEERING CONSULTANCY

**01** Roads & Highways

**02** Rail & Metro

**03** Bridges & Structures

**04** Renewable Energy

**05** Industrial Infrastructure

**06** Real Estate

**07** Water Infrastructure

**08** Government & PSU Projects

**09** EPC Projects

**10** Infrastructure Development

PETALS
ENGINEERING CONSULTANCY

# DELIVERY MODEL

**Capabilities are assembled to suit project scope, programme and technical requirements.**

**Specialist capability may be supported through qualified technical partners where required.**

01

## IN-HOUSE

Delivered by our core team using established practices and integrated workflows.

02

## PARTNER / SPECIALIST

Specialist capability accessed through qualified technical partners where required.

03

## PROJECT BASIS

Scaled to the needs of each project with clear scope, roles and deliverables.

04

## FUTURE CAPABILITY

Capability evolves with emerging needs, technologies and industry direction.

ENGINEERING CONSULTANCY

# WHY PETALS

We bring clarity, discipline and integration to every engagement. Our approach is evidence-informed, practical and focused on outcomes that matter.

### Technical Accuracy

Methodical analysis and rigorous quality checks at every stage.

### Reliable Data

Careful acquisition, validation and interpretation you can depend on.

### Fast Execution

Streamlined workflows and decisive progress from start to finish.

### Quality Deliverables

Clear, well-structured outputs that support confident decisions.

### Integrated Thinking

Cross-disciplinary insight that connects the ground to the bigger picture.

### Practical Engineering

Solutions grounded in real-world conditions and buildability.

### Responsive Coordination

Proactive communication and coordination that keeps things moving.

### Cost-Conscious Solutions

Efficient approaches that balance performance, risk and value.
